

WASTE MINIMIZATION IN OIL AND GAS EXPLORATION AND PRODUCTION

Instructor: Bart Sims, Railroad Commission of Texas, Austin, TX

Date: Monday, November 7, 2005

Time: 9:00 am – 4:30 pm

Learn how to successfully integrate waste minimization into your waste management planning! Find out waste minimization techniques for drilling and production, natural gas treating and processing, and pipeline operations. In addition, hear about examples of actual implemented waste minimization projects which have lowered operating costs, increased revenue, improved operating efficiency, and reduced regulatory compliance concerns. Also, learn how to properly classify waste generated in oil and gas operations to assure regulatory compliance and optimize waste minimization efforts.

You will receive the Interstate Oil and Gas Compact Commission's manual, "Revised Guidelines for Waste Minimization in Oil and Gas Exploration and Production".

Presented by the Railroad Commission of Texas...this workshop is a comprehensive overview of oil and gas waste source reduction and recycling techniques."

(Revised for 12th IPEC)
