

IPEC Soil Remediation Workshop

**14th International Petroleum Environmental Conference
Monday, November 5, 2007, 6:30pm – 9:30pm**

Instructed by: G. Phil Spurlin, BEACON Environmental Assistance Corporation,
Edmond, OK

No additional charge, but pre-registration is required.

Attend this workshop and learn how to cost effectively remediate oil and brine spills using hands-on tools and teaching materials. You will also learn how to evaluate vendor claims for adding microbes, using surfactants, etc. In addition to the workbook and laminated guidelines for use in the field, you will also receive free-of-charge our latest DVD titled Remediation of Brine Spills in Soil, plus the Bioremediation DVD and Cost-effective Strategies DVD. Available will be an order form to send off for any of our IPEC tools, such as the Soil Salt Analysis Kit and Chloride Analysis in Water Kit.
